Bound to Witness

by Prince Hubbard

Bound to Witness is a literary speculative novella presented as a sequence of controlled archival records. An Observer enters a contained world tasked to watch without interfering. What begins as ethical restraint slowly becomes habit, then evidence, as observation itself starts to exert pressure on the system being watched.

Structured as records rather than a traditional narrative, the novella explores responsibility, silence, and the quiet consequences of attention. It is designed for contemplative readers, book groups, and staff-pick audiences drawn to restrained, philosophical fiction.
